

AMENDMENTS

Specification Amendments

Please amend the specification as follows:

Substitute the paragraph starting at page 9, line 3, with the following:

The software development peripheral 304 is a resource that can be used as a development tool to develop software applications and operating systems for a particular platform that is different from the computing device 302 platform. From a developer's perspective, the software development peripheral 304 appears as ~~an~~ a processor emulator in that it is easy to implement and interface with. A developer can debug and execute the new operating system 346 that is executing software development peripheral 304 with the keyboard 316, mouse 320, display device 324, and/or touch screen device 326 connected to computing device 302.
